DATE MAILED: 03/01/2004

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 350 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 350 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office Patent Legal Administration at (703) 305-1383. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-34 and 36-47 are allowed over prior art.

The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggests a measuring device for simultaneously measuring a displacement of multiple locations on a target relative to a reference having optics for configuring a light beam as first and second differentiable beams portions, and a first and second position sensitive detectors to intercept first and second images respectively, created by simultaneous incident of the first and second beam portions at first and second locations on the target to provide output information representative of the displacement of the target at the first and second locations as claimed in independent claim 1.

None of the prior art teaches or suggests a measuring method having steps of splitting a light beam into first and second differentiable beam portions, intercepting first and second images created by simultaneous incidence of the first and second differentiable beam portions with first and second position sensitive detectors, and analyzing a output signal to calculate a desired z-height distance measurement from the two locations on the head suspension relative to a reference as claimed in independent claim 32.

None of the prior art teaches or suggests a measuring method having steps of splitting a light beam into a plurality of differentiable beam portions, detecting images created by simultaneous incident of the plurality of differentiable beam portions on a

target using a plurality of position sensitive detectors and analyzing an output of the plurality of position sensitive detectors due to locations of the detected images on the plurality of position sensitive detectors to calculate a desired distance measurement between the target and the reference as claimed in independent claim 47.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoon Song whose telephone number is (571) 272-2494. The examiner can normally be reached on 8:30 AM - 5 PM, Monday - Friday.
